

LOG BOOK OF ANUWAR ALI SALIM

T22-03-03963 (BSC.CSDFE 2)

ZANZIBAR E-GOVERNMENT AGENCY / ZANZIBAR (2023/2024)

#	Week	Day	Date	Work Hours	Activity
1	2	Tuesday	2024/07/30	8	Today, we focused on discussing various project titles for developing a new system. This involved brainstorming and evaluating different ideas to determine the most suitable direction for our project. The goal was to identify a concept that not only aligns with our objectives but also addresses the needs and challenges of our target audience. Through this discussion, we aimed to lay a strong foundation for the system's development, ensuring that the chosen project title encapsulates the essence of our intended solution.
2	2	Wednesday	2024/07/31	8	Today, we are initiating the planning phase for our project, the e-Government Field Student Management System. Our focus will be on designing the database architecture and defining the system's user interface. The database design will involve structuring the data to efficiently manage student information and related administrative tasks, ensuring scalability and security.
3	2	Thursday	2024/08/01	8	Today, we start planing and creating the structure of database because database is the foundation of any system. So our system consist of database having 5 tables from now, student table, staff table, request table, feedback table and available chance table. We use the VSCode as text environment to do that task.
4	2	Friday	2024/08/02	8	Today, i starting creating the database which consist of 5 tables. First for student, then for stuff, then for request, then for feedback, and last for available chance. Each table should save the specific data that are related with it.
5	3	Monday	2024/08/05	8	Today, we stay as a group and starting to design and planing different diagrams included in the system development. Use case, data flow diagram (DFD), Entity relationship diagram (ERD), is among of the diagram we looking at. Also starting looking the System requirement report and try to discus how it will look like and it should be.
6	3	Tuesday	2024/08/06	8	Today, i start create the interface for the system to be developed. Start creating login page and registration page, and another page like request page, feedback page, and others will be created.

#	Week	Day	Date	Work Hours	Activity
7	3	Wednesday	2024/08/07	8	Today, i just continue developing the pages, adding more css style and javascript code on those pages. All those pages i use mysql server to connect with. The registration page, and login page allow the student and staff to login in the system.
